EXPERIENCES

ALFA CONNECTIONS PTE LTD
Application Developer
November 2021 - Present

- Design, develop, test, and maintain internal and external applications and automated flows using Microsoft Power Platform, aligning with business requirements and standards.
- Collaborate closely with teams and end-users to gather requirements and translate business processes into effective Power Apps solutions.
- Provide ongoing support, performed maintenance, and conducted research to troubleshoot issues and implement client-driven enhancements.
- Create comprehensive documentation, including data dictionaries and user guides, to deliver clear technical references for end-users and stakeholders.

Successfully Implemented Projects

- Built a Power Automate flow to automatically remind employees of submission deadlines for internal documentation requirements.
- Developed a Power Apps application to streamline document approval and processing workflows for a leading paint manufacturing company in Thailand.
- Designed and implemented a Power Apps solution with integrated Power Automate flows to manage employee access approvals, generate reports, and automate email notifications for Singapore's top integrated resort in the travel industry.
- Delivered a budget approval system using Power Apps and Power Automate, enabling approval routing, automated notifications, and reporting for Singapore's top integrated resort.
- Developed an internal Vendor Maintenance application to manage vendor approvals, integrated with the internal Purchase Order system.
- Created an Event Registration application to retrieve and manage registrations from Microsoft Forms, improving internal event oversight.
- Developed an internal Purchase Order application for budget approvals, streamlining procurement processes and enhancing accountability.
